Trimming competition information:

Pairs Trimming Competition

At registration, members will choose between **Competitive** and **Non-Competitive**. Both options are still competitions; however, they have been divided into two separate groups as outlined below.

- When choosing partners, members may select someone from their own age group, a higher age group, or a lower age group.
  On the registration sheet, please list the partner's name and club name in the designated box.
- Teams will be judged by age category based on the **higher-age partner**.
  Example: If a Senior (SR) is paired with a Junior (JR), the team will be judged as SR. If both partners are Intermediate (INT), they will be judged as INT.
- Please have members discuss with their partner **who will bring the trimming lamb**. Both partners do **not** need to bring a trimming lamb. This will help with stalling and allow for better use of space for social areas and tack rooms by only bringing animals needed for the show.
- If a member needs a partner, please have them check the appropriate box on the registration form. They should also indicate whether or not they are willing to bring a trimming lamb.

Option #1: Competitive

Members choose their own partners and will compete for **Grand Champion** and **Reserve Champion banners**. (If you do not have a partner but would like to compete in this option you still can just click you need a partner)

(Some experience at the 4-H OP trimming competition is recommended for this option.)

Option #2: Non-Competitive

Members may choose a partner or sign up without one, in which case the sheep committee will assign a partner.

This option is great for learning and meeting new friends. **Grand Champion and Reserve Champion will be awarded prizes.**
